expansion pack Diablo 3. The use of a placebo in a double-blind study of the effect of a dietary supplement on weight loss and body composition. The overall purpose of this study was to determine whether a placebo has any impact on weight loss or body composition. Forty-nine overweight patients with an age range of 40 to 60 years were selected for participation in the study. Subjects were randomized into two groups: placebo (24 patients) and the supplement (25 patients). They took the supplement in the form of packets containing 500 mg of a medium-chain triglyceride (MCT) oil (C8) per packet. The results show that the placebo had no significant influence on body mass index (BMI). In
