The following characteristics make Photoshop a bit of an all-around image editor with a good set of tools for almost any type of image editing. ## Getting Started with Photoshop Photoshop is a formidable image editing tool and can take some practice to figure out how to do some of the most common tasks. Luckily, the Image menu (shown in Figure 1-1) provides a lot of instruction. FIGURE 1-1: Photoshop's front-end workspace. To get started using Photoshop, click the New Document icon (the one with the "+" sign) in the upper left to create a new image file, as shown in Figure 1-2. FIGURE 1-2: The New Document command displays the list of available templates. Depending on the size of the image you're working on, you'll see a considerable amount of image space appear in the workspace; you can minimize or close the image just as you do for any other window. You can easily add an additional image layer (as explained later in the chapter) by double-clicking the layer thumbnail. A linked Photoshop document (as explained in Chapter 5) can be opened at any time from within Photoshop, and it provides additional editing capability as long as you have Photoshop open. As you're first working with Photoshop, you can view the current image in the background by pressing the space bar to toggle between the new image and the background (yes, it actually has an "off" option, though you'd think that with so many pixels in the background, that would be obvious). If you like, you can change the background color using the Color Well. The default one in Photoshop CS6 is a large, multicolor circle, but you can also choose a color from the image or one of the standard color choices (such as one of the rainbow colors shown in the image in Figure 1-3). As I'm sure you're already noticing, you can resize the image by clicking the corners of the rectangle in the workspace and dragging them around. You can also use the Hand tool to resize the image. As you resize an image, the image window updates to show you the thumbnail of the new size. Just remember that you can't edit an image while it's in the background, nor can you resize the image while an image file is open. To edit the shape of the selected area, click the Magic Wand tool. (You can use another selection tool if you want,

Icelandic Parliament is a web app - mihau ===== dangrossman Even the editing interface is a fairly good looking web app. ----- bhouston Cool to see other countries advancing like this, although I suspect many are still stuck in the prototype mode. Doing the work in the browser is much easier and cheaper than paying for an enterprise app service. I'm building a REST service this week in a similar style. ----- wapz That is awesome. Urges Parents to Delay Summer Chemicals Sales WASHINGTON — The Environmental Protection Agency on Thursday proposed a total ban on several common plastics under the Toxic Substances Control Act, an order it said could affect chemicals as diverse as cleaning supplies, carpeting and children's toys. The agency is asking Congress to delay sales of the materials until it makes a determination about the safety of the chemicals, which include plastics, pesticides, paints and sealants. "The chemical industry is attempting to make a change to the way it handles chemicals," said Rodd Hartley, an E.P.A. spokesman. "But the agency thinks that without more action to help protect people and the environment, the industry's efforts will be thwarted." The Consumer Product Safety Commission, the American Chemistry Council and the American Chemical Society have come out against the E.P.A.'s plan to halt the sale of the chemicals. The industries say the E.P.A. acted too quickly and that the agency didn't have the proper tools to evaluate the chemicals it planned to ban. The proposal is the E.P.A.'s second attempt to regulate the chemicals. Last year, after a push from industry, Congress stopped the agency from mandating the ban, and the agency decided to seek only a delay. The issue comes as the E.P.A. is under intense political pressure to regulate a broad array of chemicals used in consumer products. Congress is considering a bill that would require more chemicals to be tested before they are put on the market, and the agency is conducting a study of T.S.C.A. rules governing nearly 1,000 chemicals. Supporters of the ban say that as the number of chemicals used
