Epson Connect is a great connectivity option that is provided on some of the Epson devices as a way to instantly share files with other members of your company. This is an important feature because it gives you an easy and

simple way of delivering your documents to other people without manually delivering them. Your files are then automatically delivered to the individual recipient which eliminates the need for you to worry about the outcome of the task assigned to you. More so, you can also send

pictures, videos and presentations to other people. Thanks to this feature, you are now able to see your files instantly without wasting time waiting for them to reach their destination. You can use it when you need to print images or documents from your Epson device or

when you would want to send an email with attachments attached to other people. Epson Connect Printer Setup Activation: To use it, you need to register for an Epson Connect account. This is free and allows you access to other Epson products. After that, you

need to log in so that you can add the printer, scan or email recipient to your profile. The email address is always the same and you can save on time and effort by processing the entire correspondence from your device. Also make sure you have the printer's IP address so that you can

work from anywhere. Select your connection, enter the username and password, the job ID and your e-mail address to successfully complete the process. Once you have finished the registration, you will receive an activation code or key that you can enter to confirm the process.

Customer Review: “We received an email from our CFO which required us to send some documents.

Because of the recent COVID-19 outbreak, the delivery time was quite long which compelled us to have the documents sent and printed. We had a choice of printers. We

decided to use the Epson Connect application because it was a lot cheaper and since the recent outbreak, we needed to print something to make the documents look more professional and official, and the Epson Connect application was up to the task. The product delivered

on time, all the drivers were done automatically, we received an invoice right after the delivery.” Every time you want to discover a new software service, the first thing you need to do is to look for a good option. This means that you need to know the best resource and which one is suitable to

your needs. If you look for a service that you have never

Type it in your search bar and find the available ways of completing the job. The documentation for Epson Connect Printer Setup is slightly complex, as it

depends on the version you selected, whether the product is an add-on or a standalone. For example, when you have a standalone printer, you do not necessarily have to register the device. In the case of the add-on, you can download the application from the Epson website and

the installation will be automatic. Visit the website to find more information about Epson Connect Printer Setup. As always, the installation of the software will involve following the instructions on the Epson website as the process is directly linked to the software and version.

Therefore, it is advisable to follow the pre-requisite mentioned on the page so that the process goes as smooth as possible. You need the above settings to enable the Scan to Cloud and Remote Print options.

Even though these functions are enabled by default, you may want to

upgrade them so that you can take advantage of them. To set up the service, all you need to do is open the browser and go to the official website. To choose the right category, you can use the filters menu. You will find the basic information like the model, the operating system and

the available features. It is crucial to pay attention to the version as the currently available option may be different from what was previously available. Therefore, it is advisable to get familiar with the different features and how they work to ensure you get the most out of your

device. You can print from any device with a compatible email address or you can use an app. It is also important to note that you can print directly from your phone using Bluetooth. The Epson Connect Printer Setup manual also offers links to the different options. For

example, you can go to the section with details about the administrative panels to find out more about the available settings. Users have the option of downloading the printer app. The advantage of this functionality is that you do not have to go through the whole setup process. You

will be able to manage the tasks without the need to install any software. However, the app was not available for Android users, which prompted the publication of our review. You can locate the specific setting by going to Help from the home page. In the search bar, you need to

If you have an Epson printer with the Epson Connect feature on, then

you can rely on the Epson Connect Printer Setup utility that you can access via your browser. With this tool, it is easy to access a simple interface to manage the device remotely, manage it via your email address and enable several other functions. The utility ensures that you are always

ready and prepared. In as much as it is necessary to print files from your device, you can rest assured that the job will get done. Note the security However, there are occasions when you may experience a certain amount of concern. You may be worried about being identified and let down by

the administrators so you will want to make sure that you have covered all the necessary bases. One of the most important issues is the security of your data. Before you begin using the printer, you need to activate the function in the printer so that you can have access to the files and

enable the device to identify your device. If you want to view the device from other devices, then you need to ensure that it is possible and if you have been assigned an email address for the device, then it will be even easier to attach files and printing documents. The best thing

is that you can test the prints from other devices. This is important as you will want to ensure that you have a genuine copy before submitting them for print. Most printers will soon be replaced by Multi-Function Peripherals, and in the near future, more people will use these devices than printers.

Several factors are fuelling this change and with 2.4 billion printers in use in the world, this is an increase of over 50% in just three years. This clearly means that the demand for Multi-Function Peripherals is strong. Today, the market is undergoing some significant changes, and the

printer manufacturers are reshaping their strategies to capture the clientele that's going to make the move from a dedicated printer to a multi-function one. The first and foremost change in the market is the overwhelming trend of digitization. More and more people are demanding

convenience through technology, and if you are not delivering, then you are losing to someone who is willing to do so. Most digital devices offer the possibility to print in high quality while having the ability to produce documents of very large sizes. And since every person has a scanner

attached to their mobile, it is not difficult to buy a multifunctional printer that has all the possible features you need
