The most ambitious game from the legendary studio canis maximus and is developed for the PC platform. A team in a century-old conflict has declared a truce and the world is at peace - or so it seems. The game is still far from its final episodes and already much in progress. The game's description: "Axiom Verge is the game that you have always wanted to play. A 2D side-scrolling action platformer with a sci-fi theme. Your job is to find the ancient computer to make the world a better place. This has never been done before." "Axiom Verge is developed by Tom Happ, designer of Side Scroller Game of the Year The Path of the Meek on Kickstarter. The game features amazing graphics, smooth frame-rate, loads of content and a gameplay that is both original and devious." "Axiom Verge was made with the help of a small team of people. We took more than 4 years to develop and polish the game to what it is today, and we consider it an honor to launch it to the public. We are excited to be so far ahead of schedule, but more importantly, we are thankful to be so close to completion of the game that we can share with the world. We hope you all enjoy what we've made and see you in the next update." TFC is a single player, side-scrolling, action-platformer influenced by, yet distinct from all other franchises. The player controls a being named Axiom Verge which must explore, upgrade and conquer its way through dangerous environments which consist of caverns, space stations, power plants and mines to keep the rest of the universe alive. The environments can be controlled and progressed by Axiom Verge and creatures can be befriended. Also not to forget the power-ups, which can be randomly acquired in the game world, and used to continue your progress or to make some new discoveries. Hello everyone! Welcome back to Epic's "Open World Foreva" game. This is the game I made the most of and the reason why I made this tutorial. If you'd like to support the channel, I'll gladly have an interview with you or you could become a Patron support for the channel. Interview & T-shirt: This update features currently only the game modes that I mentioned during the stream. "Mutliplayer" is the official term for it. I'll make a new tutorial for the single player game modes, as well as a few other editing things. I know it may have been a bit short but I'm really sorry about that. I hope you guys enjoyed it and got something from it. If this turns out to be successful and has the potential to grow then we'll make this a more consistent thing in the future. In the meantime I hope you enjoyed it and got something from it. If this is what Epic Games wants to create, then I'm all for it. I hope you all have a fun time and please stay tuned :) Check out my Patreon page: Social networking stuffs: Twitter: Instagram: Let's Talk Shop: Amazon: CO, CO Season 2: The European Union is a political and economic union that is a union of 27 member states and covers an area of 527,338 km² (203,575 sq mi), roughly 5 times the size of the United States. 09.11.12 - All reviews expire 180 days after publication; if you want your review kept indefinitely, contact us before reviewing any product, find out how to review products here. Version: 2.0 Availability: 20\$ Update No: 2.0 Download size: 26.9 MB Layout Beware the pdf's front-right side is fixed-width, as such this could be extremely annoying for slower internet connections. Here we have something something new from Fantasy Grounds that's not present in 2.0.0. The gem is the ability to spawn map tiles for game maps! The map tiles are created as expandable PDFs with embedded maps which you can add freely. These maps can be used either with D20 RPG rules as "permanent game map" (it's an extremely annoying PDF) or be used with any rules from Fantasy Grounds such as the new Drive Distance or AcuteAngle rules. There's a lot of options. My review will be at the end of this post. Update Ok. Since this PDF got put into the Old Library Project, a lot of people are requesting the map tile creation files be offered as non-expanded download. Thus, I'm releasing the files without their map as well. I apologise for this, but as I don't have time to work on the app, I cannot put a lot of time into this, and waiting for the expanded version of the PDF is no longer an option. If I uploaded non-expanded versions of all the PDF's, I would use up a lot of server time. And I do not want to try to fit a lot of maps in just so that other people can use them. I am working on making more areas like this available for download, but first I need to try and clear space in my Dropbox. UPDATE 2 Fixed a bug with the new font in the East Germany map tiles: The font now has the backslashes, so the backslash is no longer cut-off. UPDATE 4 Changed German (fixed backslashes!) and italian (regular accents now work). Update 5 Seraj Shards of Osiris support added UPDATE 6 New font added to Seraj Shards of Osiris map tiles UPDATE 7 Unicode font added to Seraj Shards of Osiris map tiles UPDATE 8 Added non-GUI
