PerfectCalc calculates and prints checks in PerfectCalc 6.4.2. The program can be used with a number of popular bank brands, including ING Bank, CIM Bank, Western Union, Commerce Bank and many others. PerfectCalc checks print not only in a plain red or green color, but also in a white color, where the back and front sides of the check are visible. The user can select the check's font, check in four different sizes, and change the number of the check number. The program lets you change the text and logo of the checks, as well as define the way in which they should be printed. Besides the normal printing, you can also print the checks in color. Additional functions: Print check letters or text on the front side of a check, display the check number on the front side of a check, print a check in different colors, choose a specific check size, print the checks in color. Customize the checks before printing them, add text and a logo, change the number of the checks or check size. Print checks in the same language of your current Windows system. Use the built-in check printer and customize the checks before printing them. PerfectCalc 6.4.2 is fully compatible with Windows 7 and Windows 8. It's easy to use, and doesn't require any additional software. The package includes help documentation and a printer driver that allows you to print checks without leaving the program. Publisher's description: PerfectCalc calculates and prints checks in PerfectCalc 6.4.2. The program can

developed by Status Ayer Nihon for Windows. The most popular version is 1.1.0, released on April 25, 2013. NewsPro is a very easy to use application that allows you to browse through multiple newsgroups, fetch articles, see headers, and more. All in a single program. NewsPro is a free software application developed by Status Ayer Nihon for Windows. The most popular version is 1.1.0, released on April 25, 2013. LibreOffice Impress is the perfect tool to produce high-quality presentations. With its many customizable features, you can spice up your presentations, add multimedia elements and prepare slide shows. You can also manage your calendars and contact lists, and then have an easy way to share your presentations with others. LibreOffice Impress is a powerful presentation editor with a simple interface, and it is free of charge, too. LibreOffice Impress offers many different features. One of the most useful ones is the visual presentation tool. With it, you can quickly generate various types of presentations, whether you are creating a PowerPoint presentation or a web page, or even a business card. With the visual presentation tool, you can simply create a presentation by clicking around on the screen, choosing the elements you want and arranging them in the correct order. For example, you can add pictures, symbols, words or even presentations on other pages. The tool allows you to insert various multimedia elements, such as movies, animations or even PDF files. You can easily create a bulleted, numbered or titled presentation, change the font, color and layout of the text, as well as add animations, borders or visual effects. You can even set the exact time for the slide animation and for the media that plays when a slide is changed, which helps you to make an even more interesting presentation. The tool offers many more features. They include adding text on a page, changing the foreground and background color and adding background images. You can import various fonts and also export your presentations in different formats, including Microsoft PowerPoint, HTML, MS Word or PDF. LibreOffice Impress is a very intuitive program and will not take a great amount of time to learn it. The tool does not have a lot of advanced features
