Free IMEI..Ken Hoang Ken Hoang, Ph.D. is a former research neurobiologist, biomedical engineer and neuroscientist working in the fields of neurobiology, neuroimaging and behavior. He is Director of Imaging Research at the Max Planck Institute for Neurobiology in Martinsried, Germany. His work has shown that it is possible to induce plasticity in the adult brain, thus, for the first time, allow scientists to keep nerve cells alive in the brain and study them in their natural environment. His work at the Max Planck Institute for Neurobiology is well known for its role in the study of gene therapy as a novel therapeutic technique in Parkinson's disease, and more recently, for his work on brain cooling technology. Life Hoang received his undergraduate degree in Molecular Biology from the Australian National University in Canberra, Australia and his Ph.D. in Neurobiology from the University of California at San Francisco. At UCSF he worked with Dr. Bruce Martin, a prominent neurobiologist and a native Californian, to study how the brain controls movements. His Ph.D. research led him to the field of neuroscience. He moved to Germany to work in Dr. Roman Katsev's lab at the Max Planck Institute for Brain Research in Frankfurt, Germany, where he used a combination of imaging techniques and molecular biology to discover the role of new genes and
