## OS X 10.8 Mountain Lion Retail VMWare Image

---

i get an error when trying to do the following:> os x 10.8 mountain lion retail vmware image im trying to run the virtualbox on mac osx 10.8.5 with the following hardware:-intel core2duo 2.5ghz-4gb ram-intel hd graphics 3000-750gb hard drivebut im stuck at step 2 when running the command:"\$./vboxlinuxadditions.run"can you help me 10) after the virtual machine is restarted, you will find more screen resolutions under display settings. also, the full-screen mode (from the vmware menu bar) will work now. vmware shared folders on mountain lion 10.8 and windows osif you like to transfer files between mac os x guest and windows hosts frequently without any types of networking connectivity or sharing, then you can use vmware shared folders feature. this will work only after vmware tools installation. 12) after the virtual machine is restarted, you will find more screen resolutions under display settings. also, the full-screen mode (from the vmware menu bar) will work now. vmware shared folders on mountain lion 10.8 and windows osif you like to transfer files between mac os x guest and windows hosts frequently without any types of networking connectivity or sharing, then you can use vmware shared folders feature. this will work only after vmware tools installation. 14) after the virtual machine is restarted, you will find more screen resolutions under display settings. also, the full-screen mode (from the vmware menu bar) will work now. vmware shared folders on mountain lion 10.8 and windows osif you like to transfer files between mac os x guest and windows hosts frequently without any types of networking connectivity or sharing, then you can use vmware shared folders feature. this will work only after vmware tools installation.

### **OS X 10.8 Mountain Lion Retail VMware Image**

16) after the virtual machine is restarted, you will find more

---

screen resolutions under display settings. also, the full-screen mode (from the vmware menu bar) will work now. vmware shared folders on mountain lion 10.8 and windows os if you like to transfer files between mac os x guest and windows hosts frequently without any types of networking connectivity or sharing, then you can use vmware shared folders feature. this will work only after vmware tools installation. the vmware shared folder system works on the same principle as a network share, but the data is stored inside the virtual machine disk rather than on a network drive or on a file server. the data is stored on a single host hard disk and the data can be accessed from different virtual machines using this system. you can access specific folders or partitions of windows 7 (or 10/8.1) host os through vmware shared folders from guest vm. that will enable the data to transfer back and forth easily without setting up a network or any shares. to configure vmware shared folders, go to the virtual machines settings and enable folder sharing. then, add the partition or folder of the windows host. now you need to install vmware tools for your mac. you can download vmware tools from here. once you have installed, log off and log back in to your mac, then launch vmware workstation and select the vm that you wish to install vmware tools. once the vm is up and running, click on the options menu and select preferences. then you need to click on the tools tab. click on the install vmware tools button. once the installation completes, click on ok. then quit vmware workstation and launch again. 5ec8ef588b
