

## Estim Wav Files

Here is our guide to electrosex, estim and electrostim sound files. We've listened to your comments and we've asked around the community. Here is a selection of electrosex and electrostim sound files, both wav files and mp3 files, processed to high-quality stereo files and normalised to safe sound levels, which our users have contributed. Thanks to our guest poster, Dr Orgasm for putting these all together and testing. The files are set to loop automatically and are ideal to play via this site's links, through an electrosex box, such as an ET-312b power unit or E-stim Systems 2b. Please note, these files are linked to our users' websites and streaming services, and are not hosted on kinkykink.com. If you choose to use these files for anything other than listening to, you are agreeing to the terms and conditions of this site. Please note, on iOS devices you have to wait until the whole mp3 file has loaded on your device before it starts to play. This can take a couple of minutes for the whole file to load. After that it can be stopped, started and file position moved this is down to Apple's proprietary OS, not us. A short electrostim sound file that serves its purpose. Tie up your sub. Place Ch A on the glans penis, insert Ch B in the anus. Set your ramp speed. Watch the ensuing twitching, writhing, and the inevitable orgasm(s). Repeat. This track lends itself to excessive precum. Play Estim MP3jPLAYLISTS.inline\_5 = [ { name: 325579617-user-524289624-tibetianegyptian, formats: [mp3], mp3: aHR0cHM6Ly9mZWVkc5zb3VuZGNsb3VkLmNvbS9zdHJlYW0vMzI1NTc5NjE3LXVzZXItNTI0Mjg5NjI0LXRpYmV0aWFuZWd5cHRpYW4ubXAz, counterpart:, artist:, image:, imgurl: } ]; MP3jPLAYERS[5] = { list: MP3jPLAYLISTS.inline\_5, tr:0, type:'single', lstate:"", loop:true, play\_txt:' ', pause\_txt:' ', pp\_title:'', autoplay:false, download:false, vol:100, height:" " };

## Estim Wav Files

//create a note, including URL, text, text colour, when to be played, playing scale, and key if it's an organ, piano, organ, drumset etc. seq.addNote({ url: 'https://www.bbc.co.uk', text: 'BBC news', playingOn: 1, scale: 1, key: 1, organNote: true, drumsetNote: false, playedTime: 0 }); estim wav files For the full script, you can find it on the share tab on my GitHub, or if you would like to follow along, you can run it by using the script here var seq = require('../build/Sequencer.min.js'), assert = require('assert'), Util = require('../util.js'), Shapes = require('../Shapes.js'), Hover = require('../Hover.js'); space = seq.init({ id: 'chart', height: 128, width: 128, title: 'Sequencer', view: false, position: {x: 36, y: 94}, scroll: false }); estim wav files The next thing we need to do is define some parameters for our sequence. We need to control the sound quality to make our sounds more 'human' and keep the file sizes small, so this is when we set the kbps to 8k and the compression to 3. Both of these are named after their respective areas of audio compression. The compression tells the player what level it will be compressed to, decim tells it to be a lesser quality setting at the same level, while the kbps is how much data is in each of the successive files. // define the sound quality and compression var quality = seq.quality(8), compression = seq.quality(3), notes = []; estim wav files The next thing we need to do is set up our notes. Each note will hold information about the note, including whether we will be playing a specified note (i.e., what key it is) and if we will be playing a specified scale. 5ec8ef588b
