extensive and sophisticated than the filter and adjustment tools in Psd Designer or in Dreamweaver. It allows users to apply many different types of retouching, crop, touch-up, and adjustments that are essential for producing professional-looking color images. Last, but not least, Adobe released Enhanced Retouching Panel which provides a range of new tools such as Content Aware Fill, Content Aware Move and Scope Clarity. It works with RAW files and Face Liveness for a 97 percent utilization rate and super fine adjustments even in video. To access Enhanced Retouching Panel, head to Photoshop, and choose the Smart Panel option.
